

The Vision Store

Dr. Deidra Casaus is proud to provide her patients with the most highly advanced technology available in retinal screening today! Our ability to view your internal retinal health is now dramatically improved with the **Optomap**.

Many eye problems can develop without warning and progress without symptoms. Dr. Casaus is concerned about retinal problems such as macular degeneration, glaucoma, retinal holes, retinal detachments and diabetic retinopathy (all of which can lead to partial loss of vision or blindness).

EARLY DETECTION IS CRUCIAL!

The Optomap provides:

- A digital computerized map of the retina.
- An in-depth view of the retinal layers (where disease can start).
- The ability to show you your images today during your exam.
- A permanent record for your medical file (year to year comparisons for tracking and diagnosing your potential eye disease).

The Optomap:

- Is fast, easy and comfortable. Actual screening time is only a quarter of a second.
- Will NOT require dilating drops!

Dr. Casaus strongly believes that the **Optomap Retinal Exam** is an important part of your comprehensive eye exam and prescribes it for all of her patients annually. The additional fee is only **\$39.00**. This is a screening exam and is not covered by insurance.

_____ I choose to have the **Optomap Retinal Exam** today

_____ I choose **NOT** to have the **Optomap Retinal Exam Today**
 (If you decline the Optomap Retinal exam your eyes will be dilated with drops.)
